

**Glasgow SIRE Workshop on Microeconomic Theory
Business School Lecture Theatre (BSLT), Main Building,
Adam Smith Business School, University of Glasgow.**

Friday 29th November

08:30 - 09:00	Welcome reception	Room 368
09:00 - 09:15	Workshop opening by Professor Anton Muscatelli (Principal of the University of Glasgow)	BSLT
09:15 - 10:30	Plenary Lecture: Thomas Mariotti (Toulouse)	BSLT
10:30 - 10:45	Tea/Coffee	Room 368
10:45 - 12:45	Decision Theory	BSLT
	Tatiana Kornienko (Edinburgh): <i>Nature's measuring tape: a cognitive basis for adaptive utility</i>	
	Tugce Cuhadaroglu (St Andrews): <i>Choose what you like or like what you choose? Identifying influence and homophily out of individual decisions</i>	
	Takashi Hayashi (Glasgow): <i>Gains from Trade</i>	
12:45 - 14:00	Buffet Lunch	Room 368
14:00 - 16:00	General Equilibrium	
	James Best (Edinburgh): <i>Self-fulfilling price cycles</i>	
	Andrew Clausen (Edinburgh): <i>A general and intuitive Envelope Theorem</i>	
	Yiannis Vailakis (Glasgow): <i>Reputation debt and the role of interest rates</i>	
16:00: - 16:15	Tea/Coffee	Room 368
16:15 - 18:15	Mechanism Design and Social Choice I	BSLT
	Aristotelis Boukouras (Edinburgh): <i>Approximate implementation of first-best allocations</i>	
	Anna Bogolmonaia (Glasgow): <i>Random Assignment: Redefining the Serial Rule</i>	
	Bram Driesen (Glasgow): <i>A family of asymptotic Lexmin solutions</i>	
19:00	Dinner	Melville Room

Saturday 30th November

09:00 – 10:15 **Plenary Lecture: Joel Sobel (UC San Diego)** **BSLT**

10.15 – 10.30 **Tea/Coffee** **BSLT**

10:30 – 12:30 **Mechanism Design and Social Choice II** **BSLT**

Theodore Diasakos (St Andrews): *Optimal Mechanism Design under adverse selection: the canonical insurance problem*

Michele Lombardi (Glasgow): *Harm principle and liberal egalitarianism*

Herve Moulin (Glasgow): *Size versus fairness and incentives in the assignment problem*

12:30 – 13:30 **Buffet Lunch** **Ferguson Room**

13:30 - 14:50 **Information and Contracts** **BSLT**

Daniel Z. Li (Durham): *Optimal advertising to consumers with differentiated preferences*

Andriy Zapechelnyuk (Glasgow): *Optimality of non-competitive allocation rules*

14:50-15:00 **Tea/Coffee** **BSLT**

15:00-16:20 **Game Theory and its applications** **BSLT**

Sayantana Ghosal (Glasgow): *P-stable equilibrium: definition and some properties*

Vasco F. Alves (Edinburgh): *Endogenous queue number determination in M/M/2 systems*

End of Workshop
