

UNIVERSITY OF
STIRLING

Stirling Management School

The Nuffield Foundation, Scottish Institute for Research in Economics, Stirling Management School & Behavioural Science Centre are pleased to invite you to attend a FREE symposium.

Behavioural Science and Household Energy Choices

4th December 2013, 9:30-17:15

Lecture Theatre W1, Cottrell Building

University of Stirling, UK

This event is free to attend and lunch/refreshments will be served.

If you are interested in attending and/or leading panel sessions, please complete the form at the end of this document and return it via email to Ian Lange, i.a.lange@stir.ac.uk

Main Objectives

The aim of this event is to bring the latest research from economics and behavioural science on household energy decision making to private, public and non-profit sector professionals. The day will mix presentations of new academic research with panel sessions where attendees will interact and discuss major issues in household energy policy. Symposium content will be accessible to practitioners, researchers, and post-graduate students.

Panel topics

- *How do we ensure that savings through improved consumer awareness of energy use (e.g. smart meters) are maximized?*
- *What policies or programs (e.g. Winter Fuel Payment) are most effective in keeping the elderly warm in the winter?*
- *How can different sectors (i.e. public, private, non-profit, households) contribute to closing the 'energy efficiency gap'?*
- *Can more fuel poverty reductions be delivered through the Energy Company Obligations (ECO)*

If you are interested in attending or receiving further details, please complete the form below by 25th November 2013 and return it to the Division of Economics, Stirling Management School, i.a.lange@stir.ac.uk

Behavioural Science and Household Energy Choices Symposium

I am interested in attending the Behavioural Science and Household Energy Choices symposium on 4th December 2013.
